## COVID-19 PRACTICES

### 5/17/22

---

#### **Child Positive Cases**

We require all child-positive cases to quarantine for 5 days and to test on day 6. On day 6, asymptomatic children can test to return to care with a documented negative antigen or PCR test result. If a child tests positive on day 6, they are excluded from care through day 10. For children who have the ability to mask, they will be required to mask on days 6-10 and/or follow the current masking guidelines.

#### **Close Contact**

#### **Community Exposures**

**All:** Monitor symptoms for 10 days

#### **For Unvaccinated Children:**

Quarantine for 5 days at home. A PCR test on day 5 is strongly encouraged; if it is unavailable, antigen tests on day 5 and on day 6 will be accepted. On day 6, asymptomatic children can test to return to care with documented and reported negative test results.

#### **For Fully Vaccinated Children and Employees:**

No need to quarantine. If asymptomatic, test via PCR or antigen on day 6. Report results. Mask on days 1-10 and/or follow the current masking guidelines.

#### **What About Masking?**

Masking for adults and preschool children is required. Any age-appropriate child (2 years and older) who is symptomatic and waiting for pick-up need to mask.

#### **For Children and Employees Who Have Tested Positive in the Last 90 Days Via a Viral Test:**

No need to quarantine. Watch for symptoms until 10 days after you last had close contact with someone with COVID-19. If you develop symptoms Isolate immediately and get tested. Continue to stay home until you know the results. Wear a mask around others and follow the current masking guidelines.

#### **In Home Exposures**

Please contact the Administration Team at [admin@hutchkids.org](mailto:admin@hutchkids.org) to discuss.

#### **Stay home if...**

Please see the attached document that remains the policies for testing and exclusion for symptomatic children.
